QUALITY CARE FOR PEOPLE WITH DIABETES PROGRAMME

'NADI ADVOCATE' FOR GENERAL PRACTITIONERS

REGIONAL DIABETES COURSE

1. Objectives

'NADI Advocate' Initiative hopes to help healthcare professionals specifically the general practitioners to further improve the quality of diabetes care for people with diabetes and achieve conformity of standards in diabetes care in Malaysia.

2. Preamble

The rising prevalence of diabetes globally (Malaysia included) is an urgent indication that more needs to be done to combat this presently incurable disease.

At the health care level, the National Diabetes Institute (NADI) has been actively conducting programmes to further enhance the medical practice standards among healthcare professionals involved in the management of diabetes. These include the Continuing Professional Development (CPD) Series with annual Diabetes Asia Conference and the Diabetes Complications Conference & Grand Rounds Recently, NADI also started the intensive Diabetic Footcare Course and the Managing Diabetes Course. All of these educational activities aim to keep healthcare professionals updated on practical aspects of management of diabetes, its complications and related diseases, as well as the latest advancements in practical diabetes care.

Since 2018, NADI embarks on 'Quality Care for People with Diabetes' Programme with an initiative called 'NADI Advocate for General Practitioners'. This '**NADI Advocate**' is a new initiative for healthcare professionals comprising a series of courses (lectures/case discussions) that will be held regionally throughout the country.

Through 'NADI Advocate', NADI hopes to help healthcare professionals specifically the general practitioners to **further improve the quality of diabetes care and achieve conformity of standards in diabetes care in Malaysia.**

3. NADI Advocate Regional Diabetes Course (NADI RDC)

- NADI Regional Diabetes Course is a refresher course for healthcare professionals on the basic aspects of diabetes management.
- The 2-day lectures/case discussions will be delivered by experts in diabetes and will emphasise the practical aspects of diabetes care to achieve a minimum standard.
- **The Course is opened to all doctors in Government and Private sectors. Attendees may receive a certificate of attendance and General Practitioners will be eligible to enter a programme for accreditation as 'NADI Advocate'.**
- **Three (3) Regional Diabetes Courses will be conducted every year** (subject to availability of funding).
- Based on previous events, participant is expected to receive 10 CPD points.
- **About 100 to 150 participants are expected to attend a Regional Diabetes Course initially.** The number is expected to increase once the course and 'Quality Care for People with Diabetes' Programme is more established.

Certificate of Attendance will be awarded at the end of the Course. Based on the assessment results, General Practitioner participants will be informed (by email and/or Whatsapp) if they are eligible to participate in a programme for accreditation as 'NADI Advocate'.

About the National Diabetes Institute (NADI)

The National Diabetes Institute (NADI) is established to provide a dedicated and comprehensive service for people with diabetes, to prevent and control diabetes, its complications and associated diseases.

NADI is a **non-profit, Non-Governmental Organisation (NGO)** managed by a Board of Trustees, comprising of Founding and Elected members and representatives from the Malaysian Endocrine and Metabolic Society (MEMS), Diabetes Malaysia (DM) and Ministry of Health (MOH), Malaysia with our Prime Minister YAB Tun Dr. Mahathir Mohamad as Patron.

The National Diabetes Institute (NADI) was awarded The Brandlaureate CSR Awards 2018.

The main objectives of NADI are:

- to be a National Diabetes Education Resource Centre for the country
- to establish and run a comprehensive health facility including a National Diabetes Hospital for the management of diabetes and its complications
- to create and maintain a National Diabetes Registry
- to coordinate and conduct research in diabetes and related conditions
- to be the national coordinating centre for diabetes in Malaysia in respect to statistics, education, management, research, policy and planning on diabetes and associated diseases
- to prevent diabetes and associated cardiometabolic conditions such as high blood pressure, high blood cholesterol and heart disease through promotion of healthy lifestyle
